JP11165160A: MERCHANDISE DISMANTLING SYSTEM AND DISMANTLING METHOD USING COMMON MERCHANDISE CODE

[View Images \(1 pages\)](#) | [>> News for IBMers <<](#)

Country: **JP Japan**

Inventor(s): **HAGIWARA MASATO**

Applicant(s): **NEC CORP**

[News, Profiles, Stocks and More about this company](#)

Issued/Filed Dates: **June 22, 1999 / Dec. 8, 1997**

Application Number: **JP1997000337011**

IPC Class: **B09B 005/00; G06F 017/60**

Abstract:

Problem to be solved: To obtain an effective merchandise dismantling system and a dismantling method using a common merchandise code.

Solution: This system is constituted from an information center 11 which accumulates information on merchandise in relation to a prescribed common merchandise code, on-line terminal equipment 8 connected with the center 11, an optical reader 5 connected with the equipment 8, and a common merchandise code stuck on the surface of a merchandise apparatus. On the basis of the constitution, by reading the code, information necessary for dismantling can be obtained immediately at a necessary time in a necessary place through the terminal equipment 8 connected on line with the center 11 without investigating a producer, the model of an apparatus, and others. Therefore, time and labor can be saved, enabling disassembly and dismantling suitable for apparatuses, acquisition of recovered resources, and disposal treatment to contribute environmental protection.
